I recently had a new kitchen installed by Asset and wish to commend all staff for their complete understanding of my needs and the professional way they planned and installed the whole setting.

The computer programme is first class and enabled the planning to be completed in a very satisfactory manner.'

Then the boys went out of their way to dismantle the old kitchen and install the new one, including all new appliances supplied by the company. The appliances are top range and also come with a good warranty period, which more than compared with other brands.

I wish to thank all the staff for their extremely good service and consideration of my needs and would certainly recommend Asset to anyone needing a kitchen. Also I like to shop locally where possible.

Sincerely Leonie Ingersole.
