Testimonial – ASSET KITCHENS

ASSET Kitchens was commissioned by Richmond Public School in Term 2, 2016 to fully renovate the school's staffroom area, in particular the food preparation area. From the school's perspective, within each aspect of the project, the school was extremely satisfied with the work.

Communication

From the initial contact with ASSET Kitchens, there was continual follow-up of the scope of work. ASSET Kitchens was professional in all dealings with the school. Any phone call made or left for ASSET Kitchens resulted in a same day response to meet the needs of the school. A number of meetings were organised between the Principal and ASSET Kitchens to ensure the school was receiving the work required. ASSET Kitchens was also able to provide options in design, enabling the most appropriate food preparation space to be created.

Pricing

ASSET Kitchens provided a number of quotes to meet the scope of work. The school found the pricing of the work to be excellent. Most importantly, the final product was excellent with the staff very impressed with the quality of the work.

Construction Process

ASSET Kitchens worked with the school in terms of timelines to ensure minimal disruption. They set the timeframe for the work to occur during the term break with the end date to be before the start of the following term. They met this timeframe which was certainly appreciated by the school. During the construction process, ASSET Kitchens was more than accommodating in their adjustments to the scope of works. They were willing to work around any concerns by the school in terms of the final product and at the completion of the work, they left the area clean; removing all rubbish, leaving the new area ready for immediate use.

Final Product

The final product constructed by ASSET Kitchens was excellent. The area is being fully utilised by staff who are very appreciative of their new area. The finish is wonderful which included soft closing cupboards and drawers; something that was not expected but certainly completes the work to a high standard.

I have no hesitation in recommending ASSET Kitchens and I thank them for their professionalism and wonderful quality of work.
